INSTRUCTIONS FOR FEEDING

Rack Plus Deer Block is for self-feeding to growing and breeding deer and elk in confinement or in their natural environment as a supplement to their natural diet. Protect the blocks from heavy rains to minimize waste. Consumption of Rack Plus Deer Block will vary according to the animal's body weight and the quality and quantity of available food. Consumption of this block will also vary according to the supply of food, the season of the year and the animal's need. Estimated consumption is 0.5 to 1.0 lb per head per day. Check blocks every week to 10 days and renew supply as needed.

CAUTION: Consumption of this product by sheep and goats may result in copper toxicity.

NOTE: Feeding deer or elk in the wild is illegal in some areas. Check with local wildlife officials on legality of feeding deer or elk in the wild in your specific area.
