## INSTRUCTIONS FOR FEEDING

The Rack Plus Deer Tub is for self-feeding to growing and breeding deer and elk in confinement or in their natural environment as a supplement to their natural diet. Protect the tubs from heavy rains to minimize waste.

It is recommended that the product be turned out of the tub and fed directly on the ground. Consumption of Rack Plus Deer Tub will vary according to the animal's body weight and the quality and quantity of available food. Consumption of this tub will also vary according to the supply of food, the season of the year and the animal's need. Estimated consumption is 0.5 to 1.0 lb per head per day. Check tubs every week to 10 days and renew supply as needed.

**NOTE:** Feeding deer or elk in the wild is illegal in some areas. Check with local wildlife officials on legality of feeding deer or elk in the wild in your specific area.

**CAUTION:** Consumption of this product by sheep or goats may result in copper toxicity. Do not use in association with another feed containing supplemental selenium.
