#### INSTRUCTIONS FOR FFFDING

Feed free-choice to beef cattle on pasture or roughage rations. Make sure animals have adequate pasture or roughage available and are not starved for salt or minerals. Feed continuously.

Recommended consumption of ADM 20 Cattle AN Tub is 1.0 to 2.0 lb per head per day. A two week adaptation period may be required to establish a base consumption. Consumption of this product will vary according to the weight of the animal and the quality and amount of available forage. Management of the number and location of tubs by the producer may be required to achieve target intakes. Increase the number of tubs and move the tubs closer to water or loafing areas to increase intake. Decrease the number of tubs or move farther from water or loafing areas to decrease intake. A 10-day supply of this tub may be put out at one time. Provide at least one tub for every 15 to 20 animals.

Test your forages to determine the actual supplementation needs of your cattle. Consumption over or under the recommended levels may be adequate based on nutrient needs.

CAUTION: Consumption of this product by sheep and goats may result in copper toxicity.
