

MoorMan's® ShowTec® Goat Sale Prep

Product Number
81072AZN
81072CAU

For Complete Grain Mix for Young Goats

Product Positioning

MoorMan's ShowTec Goat Sale Prep, in mini-pellet form, is designed to meet the unique needs of very young, growing and blooming show goats. It is nutritionally balanced with the precise combination of vitamins, minerals, and ingredients to feed genetically superior show goats. MoorMan's ShowTec Goat Sale Prep is a nutritionally balanced goat creep feed designed to be fed for peak performance and bloom from one week of age to weaning (or to 45 lb body weight).

Features

Provides 18% protein, 5% fat, and 15% fiber (max.)

Nutritionally balanced

Multiple, high-quality protein sources

Heat stabilized rice bran

Properly fortified with macro and micro minerals (including complexed cobalt, copper, manganese, and zinc)

Minimum 2:1 Ca to P ratio

Added copper (guarantee 27-33 ppm)

Ammonium chloride

CitriStim®

Prospanse™ yeast

Direct fed microbial

Natural-source vitamin E

Vitamin A

Vitamin D

B-complex vitamins, including thiamine

Medicated with decoquinate or monensin

High palatable formula in mini-pellet

Benefits

Supports fast, efficient lean gain in young, growing show goats.

Optimal growth and performance.

Optimal, efficient gains

Provides rice oil (energy source), gamma oryzanol (potent antioxidant), and Omega 3 fatty acids (essential fatty acids).

Optimal growth and structural development; complexed minerals are more readily available compared to inorganic mineral sources, which could be crucial to the stressed show goat; gives show goats an edge on mineral absorption; complexed zinc has been shown to support hoof integrity and immunity.

Helps lessen the likelihood of urinary calculi in male goats by ensuring a proper calcium/phosphorus ratio.

Helps support immunity and hoof integrity.

Has been shown to provide some protection against the likelihood of urinary calculi in male goats.

An ADM proprietary feed ingredient that may help the animal strengthen its defense against health challenges by supporting and optimizing gut function, gut integrity, and body defense responses.

Provides essential micronutrients to enhance feed palatability and maximize digestion.

Supports digestive function by providing beneficial microorganisms to populate the gastrointestinal tract, leading to more efficient utilization of feedstuffs.

Research shows natural-source vitamin E provides more potent antioxidant activity compared to synthetic vitamin E. Vitamin E serves as an antioxidant which helps counteract harmful free radicals produced within the body and helps maintain cell membrane and tissue integrity; needed for proper functioning of the immune system.

Needed for vision, healthy epithelial tissue, bone development, and immunity.

Needed to build strong, healthy skeletal frame.

B-complex vitamins are needed for a host of metabolic functions; thiamine is thought to help deter polioencephalomalacia and enhance appetite.

Prevention of coccidiosis.

Encourages consumption for faster gain and more efficient feeding; smaller pellet is easier for young goats to consume.

Product form/packaging: Mini-pellet form, 50-lb bag; available with decoquinatate (81072AZNE4) or monensin (81072CAUE4)

Check for availability in your area.

Guaranteed Analysis

Crude Protein, min.	18.0%
(This includes not more than 2.0% equivalent crude protein from non-protein nitrogen.)	
Crude Fat, min.	5.0%
Crude Fiber, max.	15.0%
Calcium (Ca), min./max.	0.9-1.4%
Phosphorus (P), min.	0.35%
Salt (NaCl), min./max.	0.75-1.25%
Copper (Cu), min./max.	27-33 ppm
Selenium (Se), min.	0.3 ppm
Vitamin A, min.	10,000 IU/lb

Ingredients

Processed Grain By-Products, Roughage Products, Forage Products, Grain Products, Plant Protein Products, Animal Protein Products, Animal Fat, BHT (A Preservative), Calcium Carbonate, Salt, Ammonium Chloride, Lignin Sulfonate, Vegetable Oil, Propionic Acid (A Preservative), Thiamine Mononitrate, Lactobacillus Acidophilus Fermentation Product Dehydrated, Lactobacillus Casei Fermentation Product Dehydrated, Bifidobacterium Thermophilum Fermentation Product Dehydrated, Enterococcus Faecium Fermentation Product Dehydrated, Vitamin A Supplement, Vitamin D₃ Supplement, dl-alpha Tocopheryl Acetate, d-alpha Tocopheryl Acetate, Menadione Sodium Bisulfite Complex, Riboflavin Supplement, Niacin Supplement, d-Calcium Pantothenate, Thiamine Mononitrate, Vitamin B₁₂, Biotin, Pyridoxine Hydrochloride, Folic Acid, Magnesium Oxide, Cobalt Carbonate, Copper Sulfate, Calcium Iodate, Manganous Oxide, Manganese Sulfate, Zinc Oxide, Zinc Sulfate, Calcium Sulfate, Mineral Oil, Extracted Citric Acid Presscake, Sodium Selenite, Natural and Artificial Flavors, Diatomaceous Earth, Amorphous Silicon Dioxide, Soybean Oil, Citric Acid – Ethoxyquin – BHA (Preservatives), Phosphoric Acid, Vegetable Mono- and Diglycerides, Zinc Methionine Complex, Manganese Methionine Complex, Copper Lysine Complex, Cobalt Glucoheptonate.

MoorMan's ShowTec Goat Sale Prep DC 81072AZN

For the prevention of coccidiosis in young goats caused by *Eimeria christensenii* and *Eimeria ninakohlyakimovae*.

Active Drug Ingredient

Decoquinatate 0.0015% (6.82 mg/lb)

Feeding Directions

Feed this product to starter goats from birth to 45 lb at the rate of 3.33 lb per 100 lb of body weight to provide 22.7 mg decoquinatate per 100 lb body weight. Feed for at least 28 days during periods of exposure to coccidiosis or when experience indicates it is likely to be a hazard. Make sure goats have access to clean, fresh water and high-quality forage at all times.

WARNING: Do not feed to goats producing milk for food.

CAUTION: Do not use in feeds containing bentonite. This feed contains copper. Do not feed to sheep or other copper sensitive species. Angora and pygmy breeds have been reported to be sensitive to copper supplementation. This feed contains a source of non-protein nitrogen. The equivalent protein supplied by non-protein nitrogen should not exceed $\frac{1}{3}$ of the crude protein of the total ration. Use only as directed. For ruminants only.

MoorMan's ShowTec Goat Sale Prep RU 81072CAU

For the prevention of coccidiosis caused by *Eimeria crandallii*, *E. christensenii* and *E. ninakohlyakimovae*.

Active Drug Ingredient

Monensin 20 g/ton (10 mg/lb)

Feeding Directions

Feed complete feed continuously as the sole ration to confined young goats being fitted for show. Make sure goats have access to clean, fresh water and forage at all times. ADM Goat Power Minerals should be offered free-choice.

CAUTION: Use only as directed. For ruminants only. Do not allow horses or other equines access to feeds containing monensin. Ingestion of Monensin by horses has been fatal. Monensin-medicated feed is intended for use in cattle or in goats. Consumption by unapproved species may result in toxic reaction. Do not exceed the levels of monensin recommended in the feeding directions, as reduced daily gains may result. Do not feed to lactating goats.

WARNING: Consumption of this product by sheep may result in copper toxicity. This feed contains a source of non-protein nitrogen. The equivalent protein supplied by non-protein nitrogen should not exceed $\frac{1}{3}$ of the crude protein of the total ration. Use only as directed.
