

# Sheep and Goat Tub

Product Number  
**81527AAA**

## A Free-Choice Supplement for Sheep and Goats on Pasture or Roughage Rations

### Product Positioning

ADM Animal Nutrition's Sheep and Goat Tub is a protein-mineral-vitamin supplement in tub form designed to be fed free-choice to sheep and goats on pasture or range.

### Features

Formulated specifically for sheep and goats

Biologically available protein and mineral sources

Multiple, high-quality protein sources

CitriStim®

Provides essential macro and trace minerals (including selenium)

Complexed source of cobalt

No added copper

Added molybdenum

Provides vitamins A and E

Free-choice feeding

Pressed tub

### Benefits

Provides nutrients needed to enable grazing sheep and goats to efficiently utilize pasture/roughage forages.

Supports maximum activity of rumen microorganisms for efficient forage intake, digestibility, and energy utilization.

Provides nutrients needed to support efficient reproductive performance and milk production along with maintaining body condition.

An ADM proprietary feed ingredient that may help the animal strengthen its defense against health challenges by supporting and optimizing gut function, gut integrity, and body defense responses

Supports growth, body condition, milk production, reproductive efficiency, and health, such as immune system function.

Cobalt is essential in the formation of red blood cells and supports fiber digestion, making energy utilization by the animal more efficient.

Helps lessen the risk of copper toxicity in sheep and goats.

Helps tie-up excess copper naturally-occurring in feedstuffs.

Vitamin A is needed for normal growth, reproduction, and maintenance of healthy epithelial tissue. Vitamin A needs may not be met by forages during winter or periods of drought. Vitamin E serves as an antioxidant which helps counteract harmful free radicals produced within the body and helps maintain cell membrane and tissue integrity, also necessary for proper immune system function.

Eliminates need to feed sheep and goats daily.

Easy and convenient to feed; less labor, less waste, and less storage space compared to cubes, cakes, and other high volume, labor intensive, hand-fed products.

### Recommended consumption

- 0.25 – 0.75 lb/head/day

### Product Form/Packaging

- 125-lb pressed tub (81527AAA6F)

### Guaranteed Analysis

Crude Protein, min. ....	21.0%
Crude Fat, min. ....	2.5%
Crude Fiber, max. ....	5.0%
Calcium (Ca), min./max. ....	1.35-1.85%
Phosphorus (P), min. ....	0.7%
Salt (NaCl), min./max. ....	11.5-13.5%
Selenium (Se), min. ....	2.6 ppm
Vitamin A, min. ....	23,000 IU/lb

### Ingredients

Processed Grain By-Products, Plant Protein Products, Salt, Maize Syrup, Magnesium Oxide, Calcium Carbonate, Extracted Citric Acid Presscake, Dicalcium Phosphate, Potassium Chloride, Calcium Sulfate, Ethylenediamine Dihydriodide, Manganous Oxide, Manganese Sulfate, Ferrous Sulfate, Cobalt Carbonate, Zinc Sulfate, Zinc Oxide, Sodium Molybdate, Cobalt Glucoheptonate, Vitamin E Supplement, Vitamin A Supplement, Potassium Iodide, Sodium Selenite.

## Instructions for Feeding

Feed ADM Animal Nutrition Sheep and Goat Tub free-choice to sheep and goats on pasture or roughage rations. Make sure animals have adequate pasture or roughage available and are not starved for salt or minerals. Feed tub continuously.

Recommended consumption is 0.25 lb to 0.75 lb per head per day.

A two week adaptation period may be required to establish a base consumption. Consumption tubs will vary according to the weight of the animal and the quality and amount of available forage. Management of the number and location of tubs by the producer may be required to achieve target intakes. Increase the number of tubs and move the tubs closer to water or loafing areas to increase intake. Decrease the number of tubs or move farther from water or loafing areas to decrease intake.

A 10-day supply of Sheep and Goat Tub may be put out at one time. Provide at least one tub for every 15 to 20 animals.

**CAUTION:** Feeding added selenium at levels in excess of 0.3 ppm in the total diet is prohibited.

**NOTE:** Test your forages to determine the actual supplementation needs of your sheep and goats. Consumption over or under the recommended levels may be adequate based on nutrient needs. Use only as directed. No copper compounds are added to this feed. However, naturally occurring copper in feed ingredients may combine to yield detectable copper levels. Care should be taken to minimize additional copper from forage, water, minerals or other feed stuffs available to sheep and goats.
