

An Energy and Electrolyte Top-Dress Supplement for Swine, Cattle, Horses, Sheep, & Goats

Product Positioning

Rehydrate is a supplement that provides energy, electrolytes, and other substances to help enable show animals and horses to maintain fluid and electrolyte balance while enhancing freshness. It can be used as a drench or as a top-dress.

Features

Research proven ingredients

Multiple, readily available energy sources

Electrolytes

Cell Rate®

PremiDex™

Added natural-source vitamin E

Highly palatable

Non-medicated

Powder form

Benefits

Proven results, assures consistency, and eliminates product variance.

Helps quickly sustain energy levels.

Replenishes electrolytes lost due to dehydration, stress, or shrink. Electrolytes are critical for maintaining acid-base balance in the body.

Provides a source of nucleotides that may help nourish natural body processes involved in stress, immunity, and production.

Exerts beneficial change in gut microflora, supporting production.

Protects body tissues from oxidative damage and enhances immune system function; which is especially critical under stress conditions. Research shows natural-source vitamin E is more bioavailable compared with synthetic vitamin E.

Show animals readily consume it.

No withdrawal; can be used with medicated feeds.

Easily mixes with water for use as a drench or top-dress; some settling of non-nutritional ingredients may occur when mixed with water; however, nutritional adequacy will not be effected. Measuring scoop included.

Recommended consumption:

- Swine, sheep, and goats: 6 oz (2 scoops) per head daily
- Cattle and Horses: 12 oz (4 scoops) per head daily

Product form/packing:

- Powder form, 2.25-lb (36-oz) canister (88820AAA5Q).

Ingredients

Dextrose, Maltodextrin, Corn Syrup Refinery Insolubles, Wheat Starch, Sucrose, Hydrated Sodium Calcium Aluminosilicate, Salt, Potassium Chloride, Brewers Dried Yeast, Sodium Propionate (A Preservative), Magnesium Oxide, Magnesium Carbonate, Vitamin E Supplement, d-alpha Tocopheryl Acetate, Natural and Artificial Flavors, FD&C Yellow #5

Mixing and Feeding Directions

This product is not a complete feed and must be fed with a complete show feed or complete grain mix to provide an appropriate diet. Feed show animals at least twice a day. Scoop included holds approximately 3 oz. This container holds 36 oz total weight.

Cattle and Horses: Add 12 oz (4 scoops) to 0.5 to 1.0 gallon of clean water and mix well. Administer as a top-dress or drench. Do not exceed 20 scoops (5 servings) in a 24-hour period.

Swine, Sheep and Goats: Add 6 oz (2 scoops) to 18 to 24 oz of clean water and mix well. Administer as a top-dress or drench. Do not exceed 10 scoops (5 servings) in a 24-hour period.

NOTE: Dispose of any unused portion within 12 hours of product hydration. Contents may settle. Shake canister prior to each use. To retain product quality, ensure the scoop is dry before placing in container. Store in a cool, dry place. Some settling of non-nutritional contents may occur when mixed with water. This will not affect the nutritional adequacy of the Rehydrate drench.

The directions for the use of the product are believed to be reliable and should be followed carefully. However, it is impossible to eliminate all risk inherently associated with the use of this product. In no case shall ADM Animal Nutrition or the seller be liable for consequential special or indirect damages resulting from the use or handling of this product.
